*There are twelve beast gods in Japan.
They competed with each other to rule the world
by leading their own kindred.
As time passed and the world became human,
their struggle changed form.*

*Even now,
the beast gods have become
the twelve signs of the zodiac,
The war continues, unseen—*

You are indeed
a bunny warrior.
You're fast
on your feet.

But we're
a long way
from your
friends,
aren't we?

Have you
run out of
familiar spirits?

There's
nowhere
to run now.
Rat Fiend!

I could take
you down
all by myself.
Now brace
yourselves!

TAP

Not really.

You thought it was one on one?
